

EARN WHILE YOU LEARN!!

Become a Plumber Apprentice.

All are encouraged to apply

North Coast Plumbers (JATC) will not discriminate against apprenticeship applicants or apprentices based on race, color, religion, national origin, sex, (including pregnancy and gender identity), sexual orientation, genetic information, or because they are an individual with a disability or a person 40 years or older. North Coast Plumbers (JATC) will take affirmative action to provide equal opportunity in apprenticeship and will operate the apprenticeship program as required under this Plan and Title 29 of the code of federal regulations, part 30.

We celebrate diversity and are committed to creating an inclusive environment for all. We are also registered with the VA for Veteran's Benefits

What is an Apprenticeship?

Unlike most college programs, Apprenticeship offers the chance to learn a skilled trade through a combination of related classroom instruction and *Paid* on-the-job-training.

Apprentices work under the guidance of a journey-level worker on real job sites, gradually earning more responsibilities as they learn more. The more they learn, the more they earn!

Apprenticeship is the start of a great, family-wage career you can take pride in.

Why become a plumber?

Job Security: There are job opportunities for plumbers all over the US.

Make a good living: Plumbers are in high demand and make excellent money.

Take pride in your career. The skilled trades build communities.

What do Plumbers do?

Plumbers assemble, install, and repair pipes, fittings, fixtures, water heaters, water and drainage systems in both commercial and residential buildings. They are great puzzle solvers that are able to trace leaks and other problems to the source in order to help systems operate smoothly. Plumbers use different hand tools, materials and fittings, read blueprints, follow specifications, follow city and county codes and state disability standards. They solder and silver braze copper pipe, drill, trench, lift heavy materials, work on ladders and in confined spaces. Plumbers can work indoors in all sorts of weather. They can work installing new fixtures or doing service calls to fix existing plumbing in homes or businesses.
